Part 2: Professional Development Plan (PDP)

Name: Lamban, Lyca Mae

Date: 09-25-2025

Year Level / Section: 3rd Year/ITE

I. Introduction

The MATATAG curriculum brings many changes to how English should be taught. Teachers must be ready to use strategies like translanguaging, performance-based assessment, and learner-centered teaching. As a future teacher, I need to prepare myself so I can meet these expectations. This professional development plan will guide me in improving my skills, so that I can teach effectively and help my students succeed. It also shows the steps I will take, the resources I will use, and how I will check my own progress.

II. Target Competencies

I want to develop five key competencies that are important for teaching English under MATATAG. These will help me grow as a teacher and make my teaching more effective.

Competency	Why is it important?
1. Teaching basic Reading and Writing Skills	The Matatag Curriculum gives focus to early reading, if the students do not learn basic reading ang writing in early grades they will struggle in higher grades
2. Designing new Performance Based Assessment	The Matatag Curriculum focus in real life task like project. Me as a future educator must know how to design this task well
3. Using Mother Tounge and English together (Translanguaging)	Most of the students understand the lesson when their first language is used to explain new ideas. This will help them understand English better
4. Making Learning-Centered Lesson Plan	The Matatag Curriculum promotes when students must be more active than just listening to the lesson. By making learner-centered lesson plan support this
5. Using Technology Teaching	With the help of technology it can help to make the lesson interactive and interesting, it also can help students practice

	skills

III. Action Plan

Competency	Activity/Strategies	Resource Needed	Timeline
1. Teaching Reading and Writing	I will attend workshop, I will learn phonics and I will create simple fun literacy games the i will test it with my classmate	Workshop notes, Flashcards and storybook	July- August
2. Designing Performance-Based assessment	I will join free weebinar, make at least two sample plan then ask some teacher & classmates for feedback	Laptop, Internet and sample rubrics	August- October
3. Using Mother Tounge and English Together	I will Research how to apply translanguaging, and observe classroom demonstration then i will apply it in my practice teaching	Article, Observation note and Teaching Guide	September - November
4. Making Learner-Centered lesson	I will make Lesson Plan with my friends or just by myself and i will teach them in class and evaluate	Lesson plan template and friends & classmates feedback	November - January

	what work and what didn't work		
5. Using Technology	I will explore apps like quizlet and padlet, it can create fun and interesting activity then i will test it with my peers and classmates.	Laptop, internet, apps	January - March

IV. Monitoring and Reflection

I will monitor my work and reflect on my progress. I will keep a journal where I write about what i learn and what I need to improve. I also will ask my friends and classmates for feedback, then write a short reflection .And i will check my journal to see if I am meeting my goals. This process will help me stay focused and continue improving.

V. Expected Outcomes

I expect to gain more confidence in teaching English under the MATATAG curriculum. I will be able to teach reading and writing effectively, design good performance tasks, and create lesson plans that are learner-centered. I also hope to be comfortable in using both the first language and English in class, and in applying technology to make lessons more engaging. With these skills, I will be ready to help my future students succeed in learning English.
